New River Community College 2006

Technical Skills: CSS3, HTML5, jQuery, Ruby on Rails, Groovy on Grails, .NET MVC 4, Java, C#, PHP, PL-SQL, T-SQL

Work Experience:

Web Developer – ICF International (Full Time, 8/2009 - Current)

Gained full life cycle experience developing enterprise level applications for a government consulting company.

- Developed the first responsive website for the Environmental Protection Agency using CSS3 media queries, jQuery and HTML5. The website's search feature uses Google Search Appliance.
- Used the latest front end technologies such as html5, css3 and jQuery to design modern interactive user interfaces
- Designed and implemented a web application to help U.S. states keep track of their transportation research projects using Groovy and Grails
- Created a clearinghouse of research projects using Ruby on Rails

Developer – Exemplum LLC. (IT Contractor, 8/2008 – 8/2009)

Engineered Web Based C# ASP.NET database applications for online product marketing company.

- Developed a web-based application module using C#, ASP.NET, SQL Server, and XML to cross promote products while adhering to current system restrictions
- Designed proprietary T-SQL stored procedure to query related products from a SQL Server Database

- Identified, troubleshot, and fixed errors in a C#, JavaScript, ASP.NET, and SQL Server based Proprietary Statistical Analytics tool
- Proposed and implemented a new analytics reporting tool for Exemplum's Flash based online demos

Computer Lab Manager - Radford University (Part Time, 8/2007 – 8/2009)

Managed computer staff and IT equipment at a public university.

- Hired, trained, managed 25 lab proctors to maintain high level of customer satisfaction
- Created PHP based departmental training website
- Maintained campus printers using Jetdirect HP's online printer monitoring system
- Tested and evaluated new tablet, laptop and desktop images
- Provided desktop support to end users for Windows XP and Vista environments
- Installed and upgraded computer hardware and software

Web Administrator - Ruritan National Inc. (IT Contractor, 10/2007 – 8/2009)

Administered PHP based website for a community service organization.

- Edited PHP based website according to client requests
- Added new content and upgraded web graphics and navigation
- Implemented web analytics
- Fixed cross browser Issues
- Expanded page functionality with new features such as events calendar

Help Desk Technician – EchoStar - Wild Blue Inc. (Full Time, 8/2005 – 8/2007)

Assisted end users with satellite internet connection problems for a fortune 300 company.

- Educated users about satellite internet equipment, such as DOCSIS cable modem
- Troubleshot connectivity issues on various operating systems including Win XP, MAC OS, Vista
- Configured Operating Systems for TCP/IP, DHCP
- Set up browsers for required satellite internet settings including IE, Mozilla, Safari, Opera
